**Advanced Settings**

Set your alert parameters, add your e-mail address, and click Save Alert. You will now be alerted when a new issue becomes available. You can also click the Advanced Settings link if you would like to access all of the available alert customization options.

## Creating Journal Alerts

The screenshot shows the EBSCOhost search interface. At the top, there is a navigation bar with links for 'New Search', 'Publications' (which is circled in red), 'Subject Terms', 'Cited References', and 'More'. Below the navigation bar, there is a search bar with the placeholder 'Searching: Academic Search Premier | Choose Databases >'. Underneath the search bar, there is a section titled 'Publications' with a sub-section 'Browsing: Academic Search Premier -- Publications'. A dropdown menu in this section has 'Time' selected. Below this, there are three search results listed under 'Mark Items for Search': 'AAC: Augmentative & Alternative Communication', 'AACN Clinical Issues: Advanced Practice in Acute & Critical Care', and 'AANA Journal'. Each result includes a checkbox, a small icon, and a brief description of its bibliographic records.

First, click on the **Publications** button along the top toolbar.

This screenshot is similar to the previous one, but it shows the publication 'Time' selected in the 'Mark Items for Search' list. The 'Time' entry is highlighted with a red box. The rest of the interface is identical to the first screenshot, showing the search bar, navigation bar, and the list of publications.

Enter the publication name in the **Browse Publications** field, click **Browse** and then click on the resulting link to the Publication Details page.

## Conducting an Advanced Search on EBSCOhost

The screenshot shows the EBSCOhost advanced search interface. At the top, there is a navigation bar with links for 'New Search', 'Publications', 'Subject Terms', 'Cited References', and 'More'. Below the navigation bar, there is a search bar with the placeholder 'Searching: Academic Search Premier | Choose Databases >'. The search bar has three dropdown menus: 'Select a Field (optional)', 'TX All Text', and 'AND'. To the right of the search bar are 'Search' and 'Clear' buttons. Below the search bar, there is a section titled 'Search Options' with a 'Search modes' section containing radio buttons for 'Boolean/Phrase', 'Find all my search terms', 'Find any of my search terms', and 'SmartText Searching Hint'. There are also checkboxes for 'Apply related words', 'Also search within the full text of the articles', and 'Limit your results'. The 'Limit your results' section includes dropdown menus for 'Full Text', 'Image Quick View Types', 'References Available', and 'Publication Type'. The 'Publication Type' dropdown is set to 'All' and includes options for 'Periodical', 'Newspaper', and 'Book'.

Welcome to EBSCO's Conducting an Advanced Guided Style search on EBSCOhost tutorial. In this tutorial, we will look at conducting an Advanced Search on EBSCOhost, using the Guided Style Find fields as well as applying limiters and expanders.

This screenshot shows the EBSCOhost advanced search interface with a search term 'global warming' entered in the first search field. The dropdown menu next to the first field is expanded, showing options like 'Select a Field (optional)', 'TX All Text', 'AND', and 'Subject Terms'. The 'Subject Terms' option is circled in red. The rest of the interface is identical to the previous screenshot, showing the search bar, navigation bar, and the 'Search Options' section.

Guided Style searching allows you to simultaneously search for different terms in varying article citation fields. Begin by entering a search term in the first **Find** field, and then select which field(s) to search from the drop-down list, such as **Subject Terms**.

Searching: Academic Search Premier | Choose Databases >

global warming  
in SU Subject Terms  
Search Clear ?  
AND alternative energy  
in TX All Text  
AND  
in Select a Field (optional)  
Add Row

Basic Search | Advanced Search | Visual Search | Search History

**Search Options**

Search modes  Boolean/Phrase  Find all my search terms  Find any of my search terms  SmartText Searching Hint

Apply related words   
Also search within the full text of the articles

Limit your results

Full Text <input type="checkbox"/>	Image Quick View <input type="checkbox"/>
Image Quick View Types <input type="checkbox"/> Black and White Photograph <input type="checkbox"/> Chart <input type="checkbox"/> Color Photograph <input type="checkbox"/> Graph <input type="checkbox"/> Map	References Available <input type="checkbox"/>
<input type="checkbox"/> Diagram <input type="checkbox"/> Illustration	Scholarly (Peer Reviewed) Journals <input type="checkbox"/>
Publication Type <input type="checkbox"/> All <input type="checkbox"/> Periodical <input type="checkbox"/> Newspaper <input type="checkbox"/> Book	

Guide your search using a second term and choose the All Text field to have EBSCO/host look within the full text of all articles for your term. Note: You can conduct command line searches using the appropriate field tags, e.g., \$O for Journal Name, in front of the search term in the Find field.
